PROFESSIONAL SUMMARY

Full-stack software developer (4+ years) specialising in data-heavy web applications, payments, and accounting workflows. Comfortable across the stack, from API/DB design and integration to accessible, responsive UI. Recent work centres on Stripe-powered subscriptions, finance ops enablement, and robust auditability. Brings a Mathematics degree (NTU) and a pragmatic approach to building reliable systems that handle money flows, reporting, and controls, well suited to UK fintech and SaaS with payments. Currently serving as a shared full-stack developer across two sister companies (Margin Wheeler & Swiftly).

CORE SKILLS

Languages: JavaScript (ES6+), PHP, SQL, HTML5, CSS3

Frameworks / Platforms: Laravel, CodeIgniter, jQuery, Bootstrap, WordPress, Shopify (Liquid theming, app/checkout integrations)

Databases: MySQL (relational schema design, query optimisation, indexing & performance tuning, reporting views)

APIs & Integrations: RESTful API design & integration, JSON, AJAX, webhook architecture, Stripe Billing/Checkout/Payment Intents

Engineering Practices: Secure coding, idempotency, retry/backoff, logging & auditability, CI/CD, responsive design

Domain: Subscriptions & billing, invoicing flows, basic reconciliation/reporting, fintech-adjacent back-office systems

EXPERIENCE

Margin Wheeler Pte Ltd & Swiftly Pte Ltd, Singapore

Lead Full-Stack Software Developer (dual appointment under one group)

Jun 2023 – Present

- **Designed, built, and iterated Stripe subscription and billing flows** (Billing, Checkout, Payment Intents), enabling end-to-end lifecycle handling for trials, upgrades/downgrades, proration, cancellations, and refunds with minimal manual intervention.
- **Implemented SCA/3-D Secure compliant payment journeys**, including webhook signature verification and idempotency keys, reducing payment risk and improving transaction reliability across card scenarios.
- **Architected and delivered multi-tenant SaaS platforms** across two sister companies, defining RESTful APIs, service boundaries, and shared components to support scalable onboarding and future product lines.
- **Optimised MySQL schemas and high-traffic queries** through indexing, caching, and data-model refactors, improving performance on data-heavy accounting and reporting workflows.
- **Built finance-ops reporting endpoints and internal views** to support month-end checks and basic reconciliation, strengthening accuracy and audit readiness for revenue operations.
- **Shipped tamper-evident audit logging** to improve traceability of user and financial actions, meeting internal compliance expectations and simplifying investigative workflows.

- **Partnered closely with accounting and corporate-services stakeholders** to translate operational pain points into durable product features, accelerating invoice-to-cash and back-office automation.

Edelo Pte Ltd, Singapore

Software Consultant

Jan 2023 – May 2023

- **Audited client codebases and delivery pipelines**, rapidly identifying technical debt and launch blockers, then translating findings into prioritised remediation roadmaps.
- **Defined project scope and success metrics with stakeholders**, ensuring delivery targets were measurable and aligned to commercial timelines.
- **Led cross-functional alignment between technical and non-technical teams**, simplifying complex trade-offs and unblocking decisions to keep releases on track.
- **Guided feature and stabilisation work** to reduce delivery risk and improve maintainability, leaving clients with clearer ownership and upgrade paths.

May 2021 – Jan 2023

- **Full Stack Developer** Delivered **bespoke websites and e-commerce solutions** across Shopify, WooCommerce, and WordPress, owning full lifecycle from build to launch.
- **Engineered custom themes, plugins, and integrations**, extending platform capability to meet specific merchant and business requirements.
- **Converted Adobe XD and similar design assets into responsive, production-ready UIs**, ensuring accessibility and consistent cross-device performance.
- **Improved site security, performance, and maintainability** through structured refactoring, dependency hygiene, and pragmatic engineering standards.
- **Collaborated directly with clients to gather requirements and iterate quickly**, enabling faster feedback loops and smoother go-lives.

ILLUMINA PTE LTD

Data Analyst Intern

Jul 2019 – Dec 2019

- **Built a scheduling tool to streamline test-team planning**, improving visibility of workload allocation and reducing coordination overhead.
- **Developed Tableau dashboards for trend analysis and anomaly detection**, enabling faster identification of testing issues and supporting data-driven decisions.
- **Worked with testing stakeholders to translate operational questions into analytics**, strengthening adoption of dashboards in day-to-day workflows.

Earlier roles: Vault Dragon (Admin), Workforce Development Agency (Customer Service).

Education

NANYANG TECHNOLOGICAL UNIVERSITY

BSc (Hons.), Mathematical Sciences (Statistics), 2016 – 2020
